

LET'S TALK! ELFRIDA

TUESDAY **JUNE 12** **2018** **6:00 - 8:30 PM**
Presentation at 6:30 pm
VALLEY PARK RECREATION CENTRE AND ARENA (GYMNASIUM)
970 Paramount Drive
Stoney Creek, Hamilton

COMMUNITY MEETING

ELFRIDA GROWTH AREA STUDY

The City of Hamilton is growing and the population is projected to increase to 680,000 by 2031. While the City has made efforts to grow within its current urban boundary, an urban boundary expansion is required to accommodate future population growth. In reviewing opportunities for where future growth could occur, the Elfrida area was identified as the preferred location.

HELP SHAPE THE NEW COMMUNITY FOR ELFRIDA

Gather your friends and neighbours and join us to share your ideas as we plan for a new community in the Elfrida Area. At this meeting staff will discuss the evaluation process for the three development scenarios that were presented at the last meeting, and the preferred community structure ideas which will be carried forward to a future recommended plan. We need you to let us know what you think of the evaluation and if there are other things we need to consider.

The meeting will include a presentation about the evaluation process and preferred community structure ideas followed by small group discussions about the different preferred elements. Input is important and will be used to complete the evaluation and confirm the community structure ideas that should be carried forward to shape a recommended plan.

ELFRIDA SUBWATERSHED STUDY

NOTICE OF PUBLIC INFORMATION CENTRE 2

The Subwatershed study is intended to present an approach to manage, protect, and enhance the natural environment. This includes stormwater management (quality and quantity), as well as terrestrial and aquatic resources within the Elfrida study area limits. Major issues and opportunities have been identified which provide the basis to guide future growth in an environmentally sound manner. The Phase 1 findings have been updated since the June 2017 study commencement/public consultation and will be available at the community meeting. This Study follows the planning and design process defined in the Municipal Engineers Association's Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 & 2015).

ELEVATED WATER STORAGE FACILITY AND PUMPING STATION STUDY FOR PRESSURE DISTRICT 7

NOTICE OF PUBLIC INFORMATION CENTRE 2

This study commenced in 2017 and the first Public Information Centre was held on December 6, 2017. At this second meeting, the City will have information available on the Municipal Class Environmental Assessment (Class EA) study initiated to identify the preferred site for a new water storage facility and pumping station. This study also follows the requirements for a Schedule "B" project as described in the Municipal Engineers Association's Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015). Study details, including background information, alternative siting options, evaluation results, recommended sites, and proposed mitigation measures will be available at the community meeting. All interested individuals are encouraged to attend. Written comments are also invited for further consideration.
